

SANKET DAS

VR & AI Developer | Technical Lead | Medical & Enterprise XR | European Healthcare

Pune, India | +91 84593 28768 | sanketdas@live.com

Portfolio: <https://raptor2012.github.io/portfolio/> | LinkedIn: [linkedin.com/in/sanket-das-929b11120](https://www.linkedin.com/in/sanket-das-929b11120)

PROFESSIONAL SUMMARY

VR & AI Developer and Technical Lead with 5+ years shipping production applications for the European healthcare and enterprise XR market. Specialises in Unity, Unreal Engine, AI-integrated XR, medical storytelling, GPT-driven NPC systems, procedural scenario logic, and reusable modular XR frameworks for pharma, medtech, and enterprise clients.

CORE COMPETENCIES

XR / VR Development, Medical XR Simulation, Enterprise XR, Unity (C#) and Unreal Engine 5, AI NPC Integration (GPT / Convai), Meta Quest 2/3 Deployment, Modular UPM Architecture, ElevenLabs Voice AI, Ready Player Me Avatars, Multiplatform iOS / Android / PC, Procedural Scenario Logic, Cinematic Animation, Real-Time 3D Simulation

PROFESSIONAL EXPERIENCE

Senior VR Developer

onVR | Dusseldorf / Remote | January 2025 - Present

- Built a GDD-to-LLM-flow-controller graph pipeline that reads a Game Design Document, converts it to a flow graph and auto-wires a pre-built mechanics library, reducing time from concept to playable build from weeks to hours.
- Leading a cross-functional development team on a multiplatform XR/Mobile component warehousing solution in Unity targeting Meta Quest, iOS, and Android simultaneously.
- Architecting a modular Unity Package Manager (UPM) system of reusable multi-platform components to accelerate delivery across client projects.

VR Developer

onliveline GmbH | Cologne / Remote | May 2023 - January 2025

- Led all programming on VR Medical Storytelling single-player applications, delivering patient education and HCP training tools for major pharmaceutical clients in Europe.
- Created in-engine cinematic animations using Unity Timeline and Blender for high-fidelity storytelling within real-time XR environments.
- Integrated ElevenLabs API for generative NPC voice acting inside VR medical narratives, reducing dependency on pre-recorded studio audio.
- Built photorealistic VR avatar NPCs using Ready Player Me SDK and Mixamo animation pipelines.
- Developed a GPT-powered 3D AI character with context-driven motion capture animation selection for believable adaptive real-time interactions.

XR Developer (Freelance)

Weltenmacher GmbH | Remote | May 2022 - May 2023

- Designed and built a standalone first aid VR training simulator for the German certification market, featuring driving simulations, emergency calls, AI pedestrians, accident animations, and hands-on object manipulation.
- Implemented procedural, randomised scenario logic requiring users to respond according to certified first aid guidelines, enabling repeatable and measurable training outcomes.
- Optimised and ported PCVR application to Meta Quest 2, achieving standalone deployment without performance degradation.

Game Programmer and XR Consultant

Self-Employed | Pune / Remote | February 2019 - January 2022

- Developed gamified mobile applications for an NGO to teach modern fishery techniques to farmers across India, combining instructional design with interactive 3D environments.
- Provided consulting to local studios on rapid prototyping, game design, and economy balancing; prototyped Facebook Instant Games in Unity.
- Implemented Google Analytics backend instrumentation and optimised real-time performance for mid- and low-end Android devices.

Game Designer (Intern)

SUTD Gamelab | Singapore | *May 2017 - August 2017*

- Designed PvP combat levels for a multiplayer title showcased at Game Start Asia 2017; authored spec documentation for an in-game editor balancing tool.
- Shipped a full MVP product within a 12-week internship cycle.

EDUCATION

MA in Games Enterprise

University of South Wales, Cardiff, United Kingdom | September 2017 - September 2018

Game Design and Project Management

Rubika Supinfogame, Pune, India | September 2014 - March 2017

TECHNICAL SKILLS

Engines: Unity (C#), Unreal Engine 4/5

Platforms: Meta Quest 2/3, Android, iOS, PCVR, Standalone XR

Languages: C#, Unreal Blueprints

AI and APIs: OpenAI GPT API, Convai SDK, ElevenLabs API, Ready Player Me SDK

3D and Animation: Blender 3D, Unity Timeline, Mixamo

DevOps: GitHub Actions CI/CD, Perforce, AWS, JIRA

Domain Skills: Medical Storytelling, Enterprise XR, XR Simulation Design, Patient Education, Training Scenario Logic, Modular SDK Architecture, Level Design, Economy Balancing

AWARDS AND RECOGNITION

- Winner, Student Game of the Year 2016 - Nasscom GDC (NGF Award) - Proximity
- Winner, Best Student Game India and International - FICCI BAF Awards 2017 - Tremor
- Nominated, Indie Prize Showcase - Casual Connect San Francisco 2016 - Proximity
- Nominated, Big Indie Pitch - Pocket Gamer Connect Helsinki 2017 - No Monkey Business
- Nominated, Taipei Game Show 2017 - Overpowered
